Create RFC guide

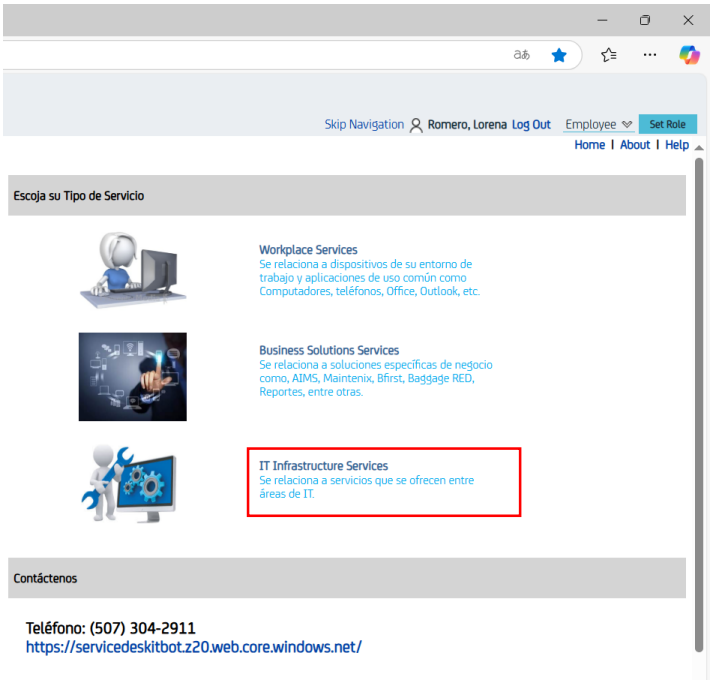

Step 1: Go to https://helpdesk.somoscopa.com/CAisd/pdmweb.exe and click on **Registro de Solicitudes**

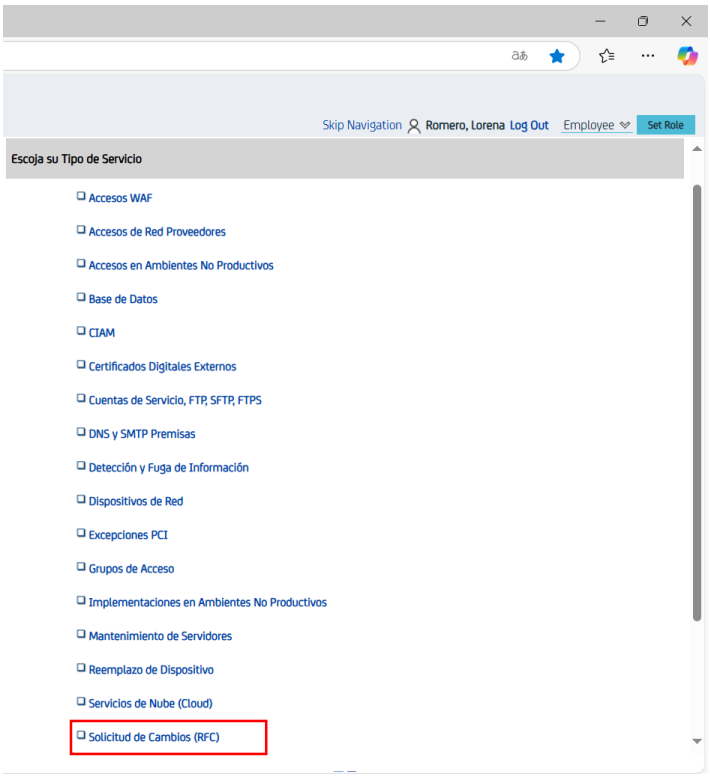

Step 2: Click on **Solicitudes de Tecnología**

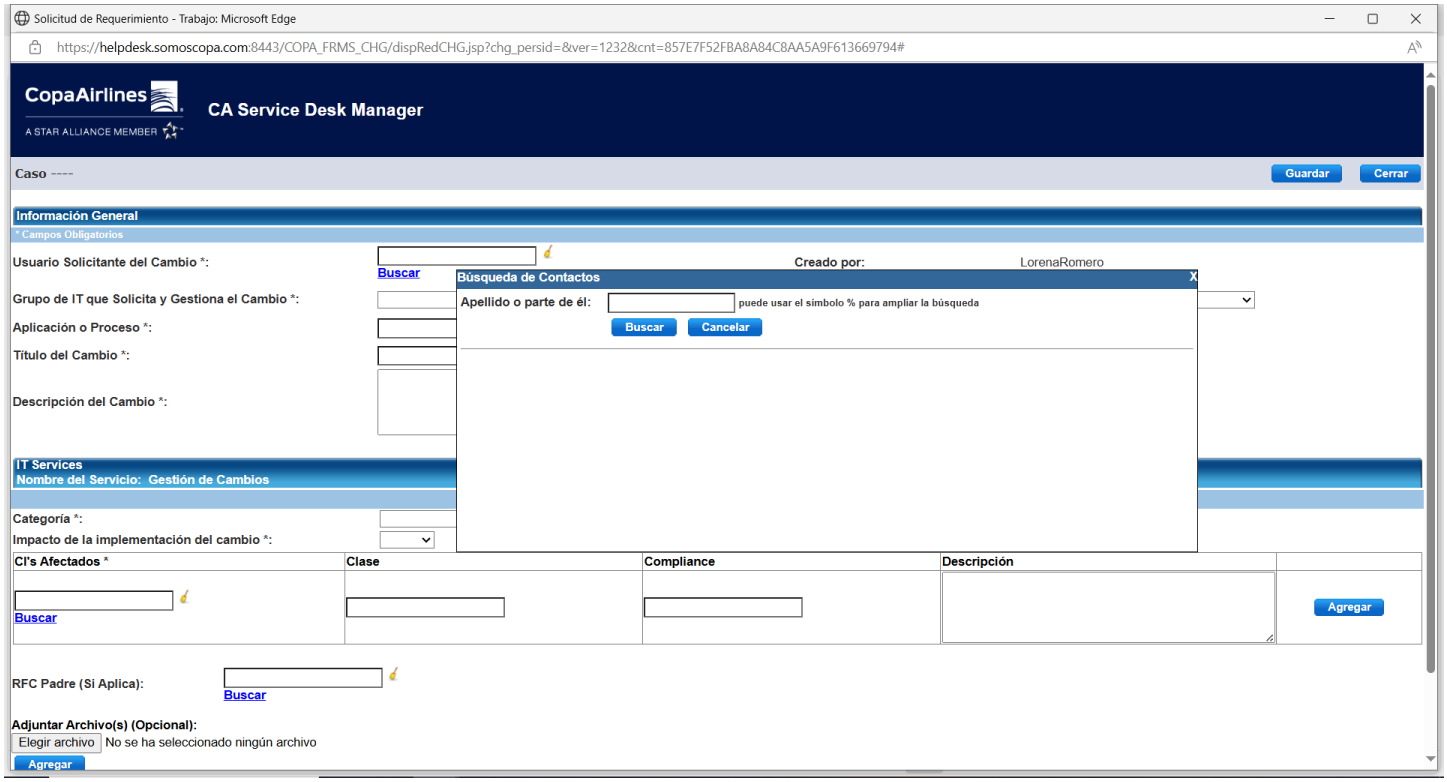

Step 3: Click on **IT Infraestructure Services**

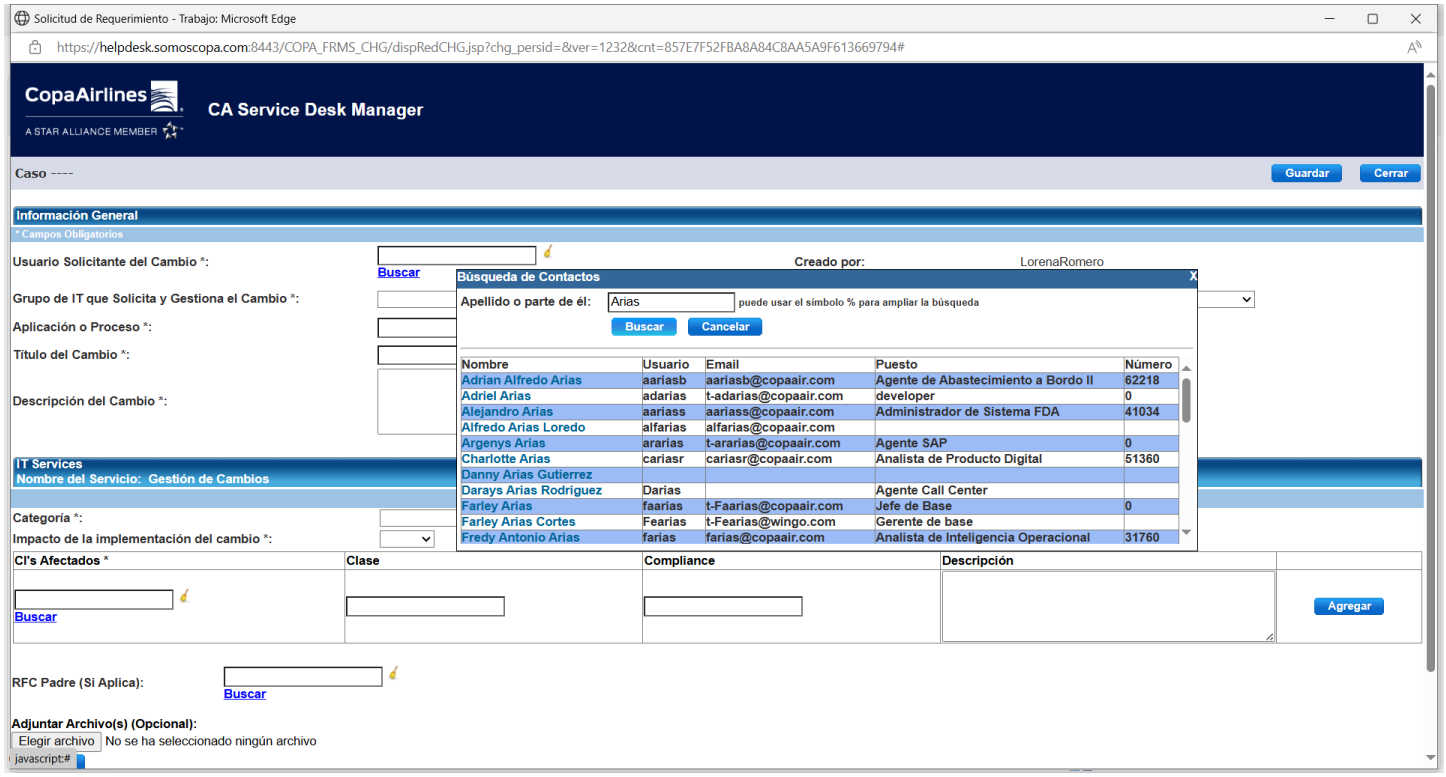

Step 3: Choose the option **Solicitud de Cambios (RFC)**

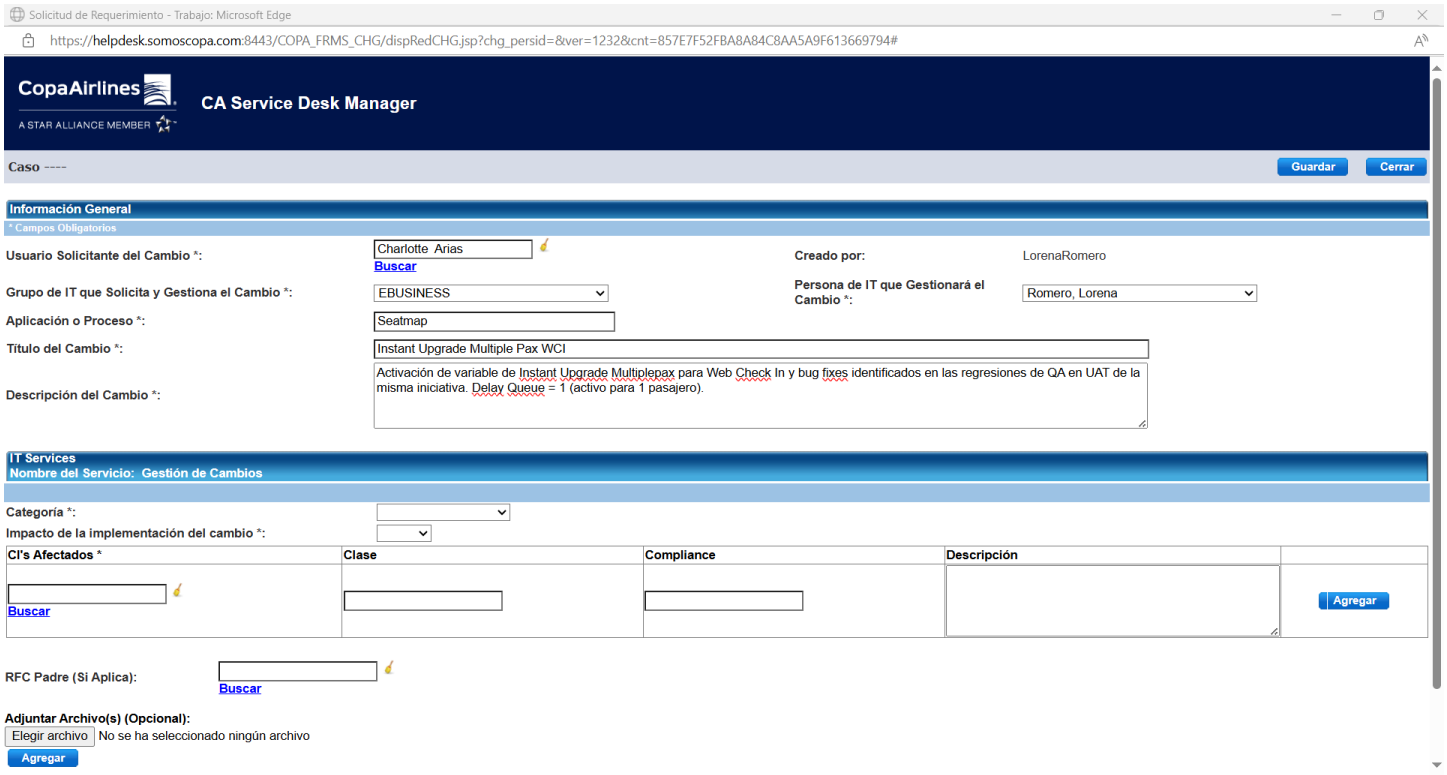

Step 4: Click on **Buscar**

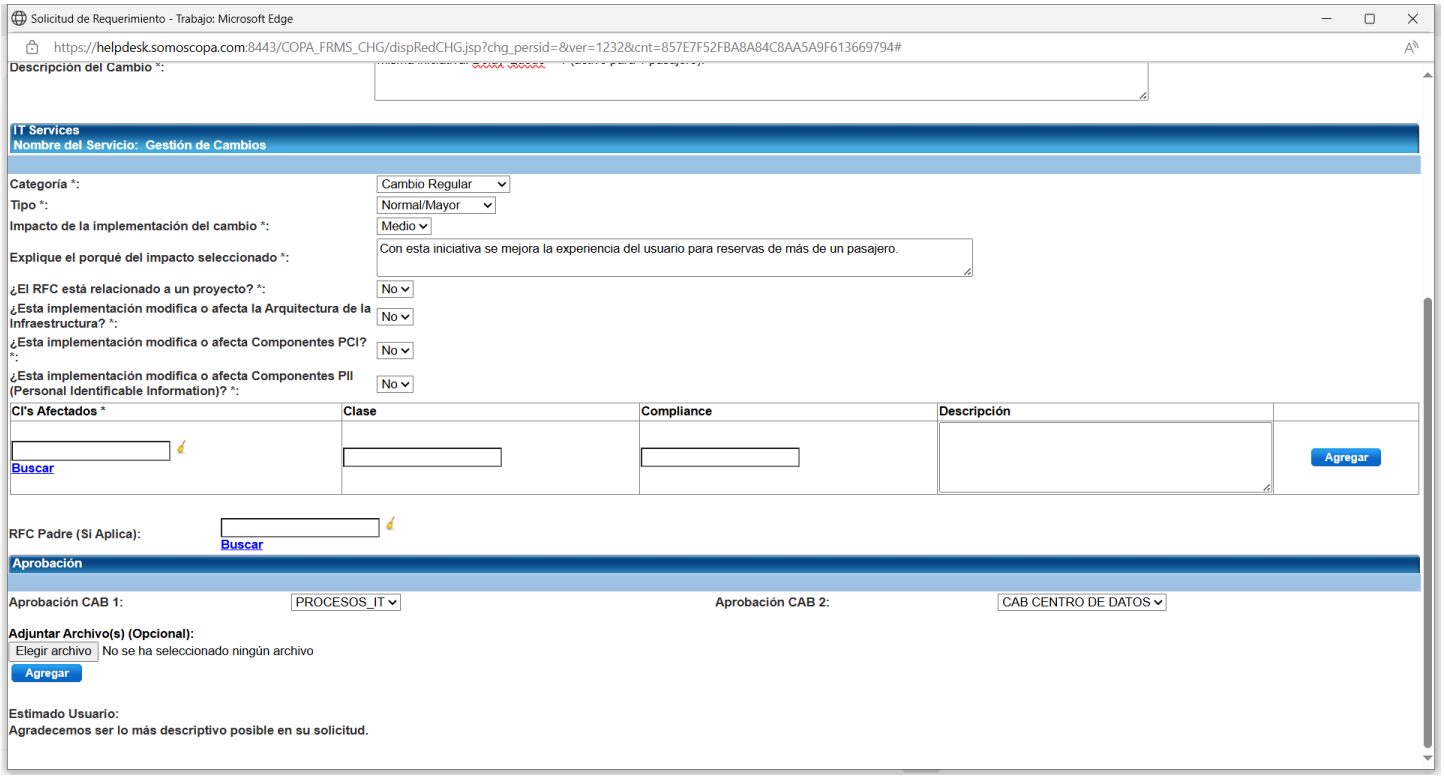

Step 5: Enter the last name of the change requester in the field, which in this case would be the product owner, click on 'Buscar,' and select the name.

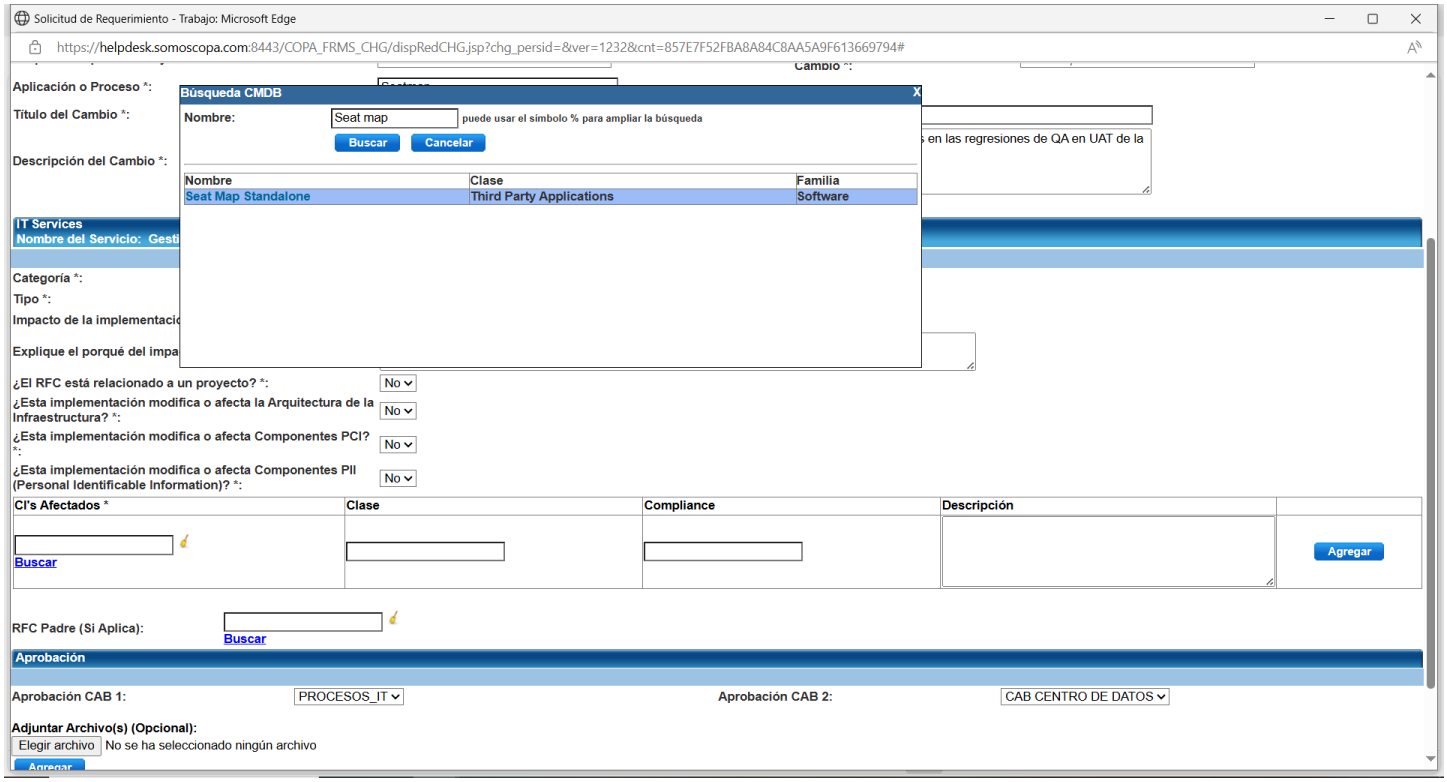

Step 6: Complete the **Información General** section with the corresponding information according to the change being made to the application. For **Grupo IT,** choose the department of the user requesting the change. For Product Owner, always choose EBUSINESS.

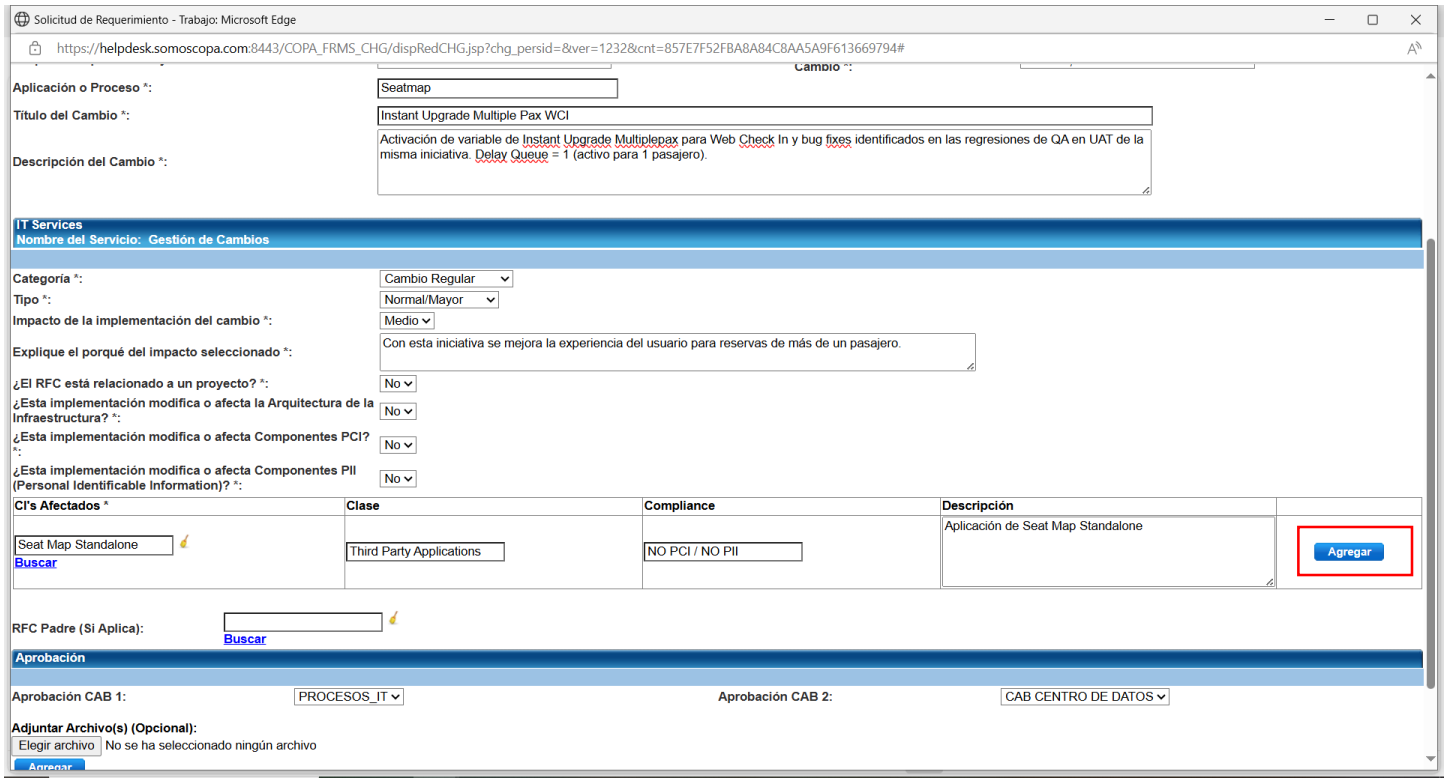

Step 7: In this section select the options that apply to the requested change.

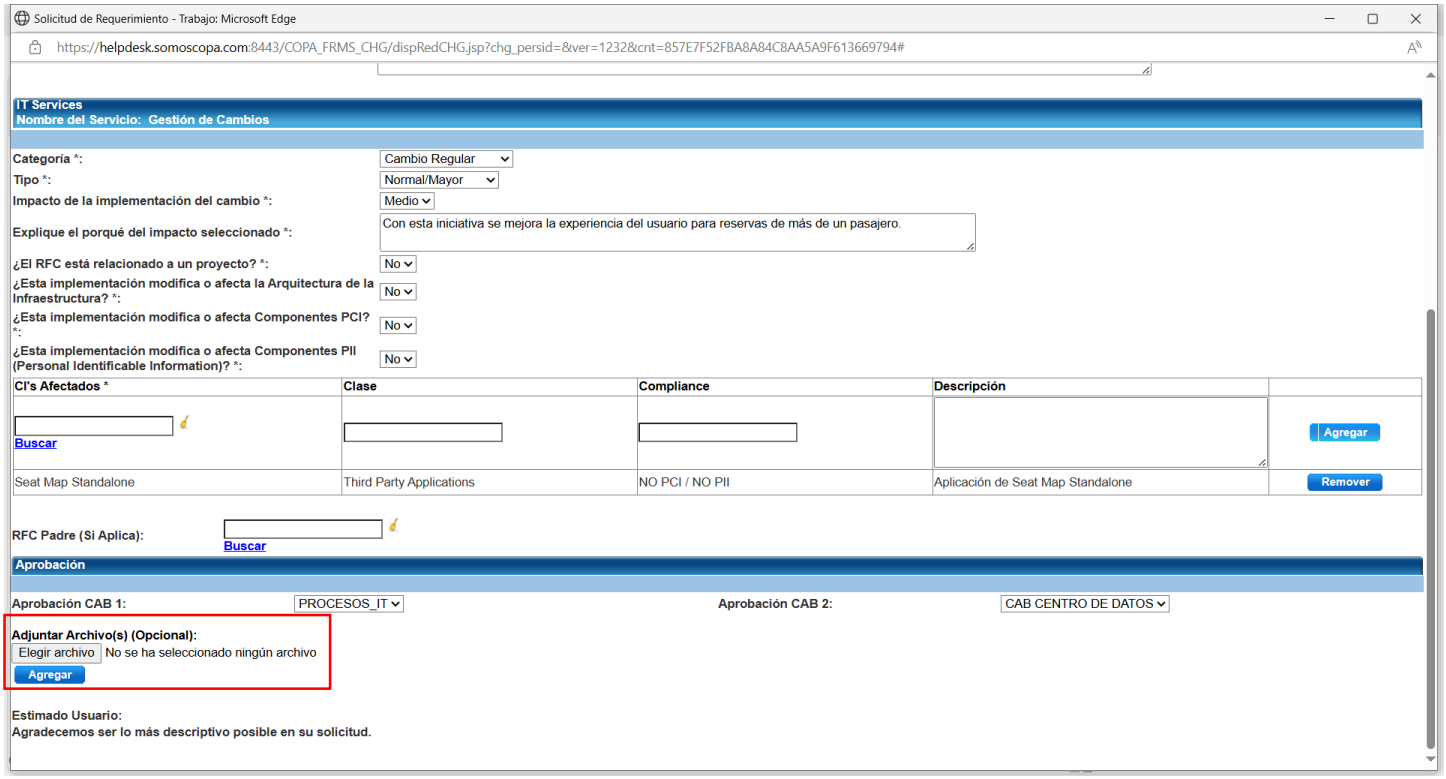

Step 8: In the **CI's Afectados** table, click on '**Buscar**' and type the name of the application in the field. Then, click on the **'Buscar' button** and select the application.

Step 9: Once you select the application click on **Agregar**

Step 11: In the attached documents section, the documents that should be attached are deployment plans for product releases, UAT, and staging validations

Step 12: Once documents are attached, scroll up to save the RFC, click on **Guardar.**
